How to use this file

You can create your artwork using the blank Artboard named "Your Illustration" as a starting point.

Every Artboard contains several elements. Each element has pre-made assets of a specific subject. The currently available sample asset themes are:
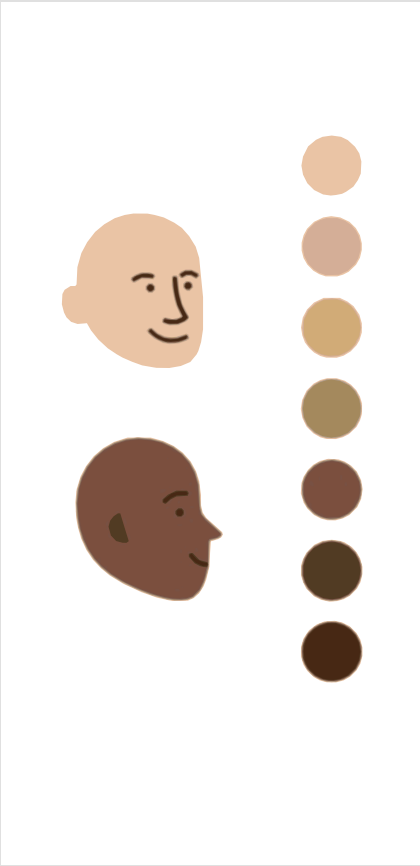

- Heads
- Hairstyles
- Legs
- Hands
- Graphics

You can add the assets to your Artboard by copying and pasting them or by dragging & dropping them onto the Artboard.

All asset shapes are fully editable; you can modify the color and stroke attributes or the shape's path in seconds.
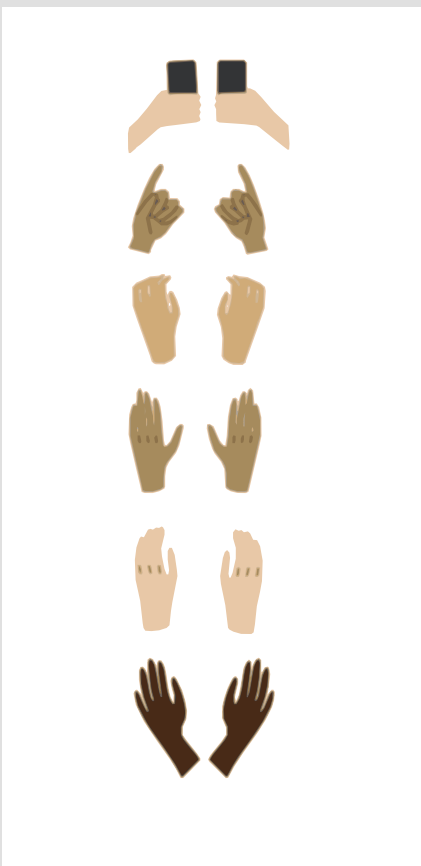

✏️ **Note**: Some elements are grouped; to access them, you might need, in some cases, to select the group layer to be able to access them!

Let your imagination loose, and have fun creating!" 🎉
